AGENDA:
6:30pm - Doors open
6:30-7:00pm - Social
7:00-7:45pm - Talk by Josef Singer from Puppet followed by Q&A
7:45-8:30pm - Social / Wrap Up

Thanks to StackOverflow for sponsoring Food/Drinks & venue.

Puppet Bolt - Limitless automation with agentless, multi-platform solution

Past event

without requiring an agent or any Puppet knowledge.

Driven through a command line interface (CLI) Puppet Bolt connects to remote systems via SSH and WinRM, can run in any language and is compatible with many of the tools you use today. You can use Puppet Bolt to run one-off tasks, and if you already use scripts to automate the provisioning and management of some nodes, you can use Puppet Bolt to move a step beyond scripts, and make them shareable.

Reuse existing scripts in Bash, PowerShell, Python or any other language. You can perform various tasks like start and stop services, reboot remote systems, gather packages and systems facts from your workstation or laptop on any platform (Linux and Windows).

Take advantage of more than 5,700 modules available on the Puppet Forge for everything from deploying database servers to setting up Docker or Kubernetes.

Enjoy limitless automation with Puppet Bolt.

SPEAKER BIO:
Josef is a Sr. Technical Solutions Engineer at Puppet, where he helps customers navigate their DevOps journey with automation and orchestration. Prior to joining Puppet, Josef was a Cloud Automation Pillar Lead HP Enterprise, specializing in HPE solutions for hybrid cloud management. Josef also worked in presales at a string of much smaller startups prior to joining HP, including Opsware, SupportSoft, and Mercury Interactive. Josef began his career in the distant mists of time as a C++ developer at Bellcore.
